Maxime Condaminat

Full-stack Engineer · TypeScript, React · Web3

maxime.condaminat@gmail.com · maximecd.com · github.com/maximecd
Based in France, fully remote

SUMMARY

Full-stack developer with 4 years of experience, specialised in front-end with a modern TypeScript stack (React, TanStack), including 3 years in web3. I ship features end to end with high autonomy, and use agentic AI workflows to raise the quality bar on production code and to iterate quickly on POCs. Ready to take on a larger-scale product and grow toward a tech lead role.

SKILLS

Front-end frameworks & tooling: React, Next.js, TanStack (Start, Router, Query), React Router, Jotai / Zustand, Tailwind, StyleX, Base UI

Web3: viem, wagmi, passwordless wallet onboarding (embedded wallets, passkeys), ERC-4337 smart accounts (Alchemy Account Kit)

Desktop: Electron, Tauri

Back-end: Node.js / Bun (Hono, Effect), Laravel (expert), which gives me a solid grasp of backend priorities

EXPERIENCE

Full-stack Developer, nüme (via OpenGem, then direct) Jun 2024 – Jul 2026

Art digitisation startup, team of about 10, working directly with the CTO

- Joined the early team and built the software side of the product from scratch, owning architecture decisions for the web stack alongside other developers
- Built a Laravel + Inertia/React platform where artwork owners browse their collections, with a back office to manage clients and record data on-chain via smart contract integration and ERC-4337 smart accounts
- Created a block-explorer-style tool for our smart contracts where owners authenticate via their smart contract account to access detailed artwork data
- Built a React + Tauri desktop interface to control an art-scanning robot, guiding the Python developer who built the robot integration
- Set up infrastructure end to end: dedicated servers running our microservices, Docker, CI/CD, Coolify deployments, and a migration to Cloudflare for caching and load handling

Freelance Full-stack Developer Sep 2023 – Present

- Built from scratch a full NFT marketplace for premium spirits with Next.js, and contributed to other NFT sales platforms, connecting the front end to smart contracts with wallet-based user flows
- Shipped features end to end on a Laravel SaaS used by several thousand users

Earlier experience

Full-stack Developer (work-study), NEXI CONSEILS — Sep 2022 – Aug 2023: contributed to a SaaS product (Laravel, React) and built websites. Short earlier internships in web development.

EDUCATION

Bachelor's degree (Licence Pro) in Web Application Development, Full-stack Developer track, La Rochelle Université — 2022 – 2023 (work-study)

BTS in IT Services for Organisations (2-year vocational degree), Lycée Merleau Ponty — 2020 – 2022

LANGUAGES

French: native

English: fluent (occasional technical meetings with US/UK teams in past roles)
